## SUMMARY

---

Data Science graduate passionate about data analytics and insight discovery. Skilled in Python, SQL, Power BI, Excel, and data visualization. Actively developing real-world problem-solving skills through hands-on projects and eager to contribute to data-driven decision-making in a professional environment.

## EDUCATION

---

Princess Nourah bint Abdulrahman University | 2019-2021

**Diploma in Information Technology**

Prince Musaid bin Abdulrahman University| 2023–2026

**Bachelor's degree in Data Science**

## PROJECTS

---

### SQL Real Estate Analysis | SQL Server | [GitHub](#)

Analyzed Riyadh real estate data using SQL Server. Performed data cleaning and preprocessing, conducted neighborhood price analysis, explored property types and size patterns, and identified trends in luxury properties and real estate agencies to support data-driven market insights.

### Riyadh Metro Dashboard | Power BI | [GitHub](#)

Developed an interactive Power BI dashboard for Riyadh Metro. Analyzed 94 stations across 6 lines, visualized station types, identified shared stations, and mapped geographic distribution using DAX-driven insights to highlight key patterns.

### Saudi Jadarah Job Data – 2025 | Power BI | [GitHub](#)

I developed an analytical project focused on job opportunities in Saudi Arabia using data from the Jadarah platform. I collected, cleaned, and merged the dataset, then built an interactive Power BI dashboard to visualize job distribution across sectors and regions and uncover key trends in employment opportunities.

### Flight Data Analysis – King Khalid International Airport (RUH) | Python | [GitHub](#)

Developed a data analysis project focused on flight operations at King Khalid International Airport (RUH). Used Python to clean and analyze the dataset, uncovering patterns in airline activity, aircraft types, peak hours, and busiest days. The project also explored air traffic flow by identifying major origin and destination airports, supported by clear data visualizations.

## COURSES

---

- Introduction to SQL | DataCamp
- Artificial Intelligence Concepts and Advanced Applications | SDAIA
- Project-Based Learning Programme in Data Analysis | IBM SkillsBuild
- Introduction to Data Science in Python | Coursera
- Linear Algebra for Machine Learning and Data Science | Coursera
- EYOUTH Learning Plan | IBM

## SKILLS

---

### Technical Skills:

- Programming: SQL, Python
- Database Management: Microsoft SQL Server
- Data Visualization: Power BI
- Performance Optimization: Query Tuning, Indexing, Views
- Tools: Microsoft Office Suite (Excel, Word, PowerPoint)

Languages: Arabic, English

### Soft Skills:

- Analytical Thinking
- Problem Solving
- Attention to Detail
- Time Management
- Teamwork
- Communication
- Adaptability
